Claim Rejections under 35 U.S.C. 112, 2nd paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5,7,8,11-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1-5,7,8,13-15 recite the broad recitation organic solvent, polymer molecular weight, and functional groups, and the claims also recite polar solvents, preferred MW and ratio ranges, preferred or particular functional groups which are narrower statements of the ranges/limitations.

4. Claims 11,12 provide for the use of the composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is

intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 11,12 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

5. The phrase "which are known per se" in claims 14 and 16 is a relative phrase which renders the claim indefinite. The phrase "which are known per se" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Please explain this phrase.

Claim Rejection under 35 U.S.C. 103(a)

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-3,5-7,9-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Innami et al (US 5,428,000; 6/27/95) in view of Rueegg (WO 200000031; 1/6/00). Innami

discloses a method of controlling the growth weeds comprising applying to the weeds a herbicide composition comprising fluazifop (herbicide), water, adjuvants, and cationic polymer. See abstract, column 6 line 49 - column 7 line 18, column 46 lines 1-68, claims. Innami does not teach the composition / method comprising the safener, mefenpyr-diethyl and the instant percentages and molecular weight. However, Rueegg teach a herbicidal composition / method comprising mefenpyr-diethyl. See abstract. It would have been obvious to one having ordinary skill in the art to add the mefenpyr-diethyl taught by Rueegg to composition / method taught by Innami. One would have been motivated to do this because prior art references teach herbicidal compositions and herbicidal methods.
